QDUG October 2013 Meeting

October 9th, 2013

Topic

Argos 4.2 New Enhancements

Stephanie provided a presentation of the new enhancements in Argos 4.2. We are planning to upgrade sometime in November. I will let you know when we have a date set for the upgrade.

Please see the following links for documentation on the new Argos 4.2 features.

For Argos Report running – There has been some changes made to the way reports can be run. The following link steps you through running a report in Argos 4.2 as well how to run saved setting.

For Argos Datablock designers – New features are now available to add to datablocks including radio buttons, query sequencing, and revision control plus many more.

Argos Open lab is still held every Friday from 2-3 in Cheek 100. This is a time to come and ask any question you have about Argos or query writing.
